

# Gurukul Public School

June 2020

## The Work Continues

Times are difficult but we can't lose hope

The school is closed till further orders from the government. In these uncertain times the situation is even more difficult for schools like ours where there is no support system for children at home. Our class 10th students who are due to give their boards in 2021 are the most affected. Our staff is working from home to provide learning material to students via WhatsApp but as everyone doesn't have an android phone we aren't able to reach all children. We are providing print outs and books too.

1

### CBSE AFFILIATION

Applied for class 12th affiliation to ensure continuity of education for our 10th students

2

### SUMMER LIBRARY

Starting a Summer Library for kids where they could get books and workbooks issued

3

### SCIENCE LABS

A separate Physics and Chemistry Labs are required for class 12th

### Book Distribution

For Class 10th Students appearing for their boards in 2021

### Work from Home

Teachers are preparing lesson plans from home and sending via WhatsApp

### Food Distribution

To the most vulnerable sections of the society especially the old and women

## Our children's smiles make it all worthwhile

Our students give us the hope and courage to continue on our journey

In spite of all the difficulties we have continued to support our students and the community. We distributed more than 2000 ration kits to support the most vulnerable members of our society, especially the elderly and women. I met so many wonderful women over the last couple of months, each of them have a story to tell but they aren't losing hope and they truly believe that they will

get over these difficult times. You could support our work by sharing our fundraiser on Milaap - <https://milaap.org/fundraisers/support-gurukul-public-school>.

There are 2 main things that we need for school to ensure continuity of education for our children and need your support for it.

1) **Summer Library** - The library will allow the students to take books home during these times and maintain a continuity of education. This time at home could be best utilised in developing the reading and writing skills of our children, which will help them, do better in class when they are back in school. The library will not only have reading material but lot of workbooks which are self explanatory.

2) **A Physics and a Chemistry Lab** as we have applied to CBSE for class 12<sup>th</sup> affiliation this year to ensure continuity of education for our children who would be appearing for their class 10<sup>th</sup> Board exams in 2021. One lab is half done but we need resources to complete it.

## SUPPORT US

Please do continue to support us as it is even much more needed at this time. Our children are facing a lot of issues at home, be it nutrition or books and we are trying to support them with the limited resources we have. The cost of supporting a child's education at school is Rs 12000 pa or you could support us in building our school library or science labs. The Bank account and **UPI** details are as follows-

UPI - **connectwithgurukul@upi**

Name of A/C: Gurukul Public School

A/C no - 2009050000152
